x360 Recover

Business Continuity and Disaster Recovery

Data Sheet

Protect What Matters Most

Endpoint Backup

Protect data for remote employees and hybrid environments

No-Appliance BCDR Public Cloud Backup

Fast and reliable cloudbased disaster recovery and business continuity Data protection and business continuity for VMs running in clouds

Turn-Key BDR
Immutable, application-

Immutable, applicationaware backup to turn-key appliances and cloud.

Simplify, Scale, and Succeed: The Powerful Flexibility of x360Recover

Axcient x360Recover is the most flexible and cost-effective business continuity and disaster recovery (BDR) solution for MSPs and the SMBs they serve. Axcient partners deliver their clients customization, choice, and flexibility from a single solution deployed however you need it – with an appliance, in the cloud, or hybrid.

Easy to manage, x360Recover boasts Chain-Free backups, AutoVerify, AirGap, and PSA/RMM integration. These technologies mean there is no chain management, data is automatically checked for recoverability after backup, backups are protected from ransomware and deletion, and ticketing and billing processes can be fully automated.

Critical capabilities of x360Recover:

- → Never reseed and no chains to break because your backup is Chain-Free
- → Deployment choice option with a turn-key appliance or appliance-free with Direct-to-Cloud (D2C)
- → AutoVerify automated backup integrity testing ensures backups are always recoverable via boot and deep volume checks
- → Flexible backup schedules as often as every 15 minutes
- Ransomware protection because AirGap guarantees immutable data
- → Near-instant virtualization locally and in the cloud
- → Predictable billing with flat fee pooled storage
- → Backup public cloud VMs (Azure, AWS, GCS, etc.)
- Local cache to accelerate direct to cloud restores and virtualization
- Self-management of DR plan testing and cloud DR and virtualization with Virtual Office
- → Client-specific Runbooks for fast virtualization and DR plan testing
- → Automate ticketing and billing processes with PSA and RMM integration
- → BYOD Choice bring your own device or use your data center, or use a turn-key Axcient appliance
- → BYOC Choice Bring Your Own Cloud Public, private, or use the Axcient Cloud
- → x360Recover agent for macOS, Microsoft Azure, and Linux
- Public APIs and NAS Backup coming in 2024!

KEY FEATURES:

Protect Everything:

Support for Windows, VMware, Hyper-V, Linux, public cloud, macOS, and IaaS

Direct-to-Cloud (D2C):

MSPs can opt for BDR without the appliance and associated costs and maintenance, with Local Cache for faster folder, file and bare-metal restores

AirGap:

Never pay the ransom –
AirGap safety archive ensures immutable data

BootVM with AutoVerify:

AutoVerify is an enhancement to x360Recover's nightly BootVM check feature which validates the recoverability of backup snapshots and captures a screenshot of the protected system

Bring Your Own Device:

Purchase or lease BDR hardware appliances from Axcient or BYOD. x360Recover installs in <10-minutes on any Ubuntu certified hardware

Bring Your Own Cloud:

Use our cloud, BYOC, or use both – the choice is yours.
Use the secure and compliant Axcient Cloud, your private cloud and data center, or a public cloud. Use both Axcient's Cloud and your private cloud to retain multiple off-site copies of data

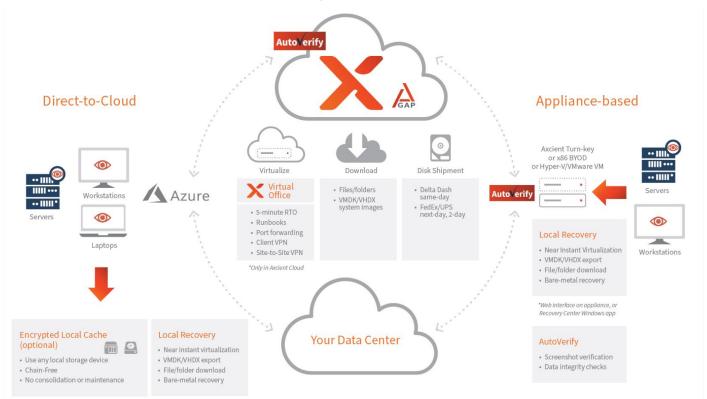

One-click Restore:

Free Virtual Office for near instant failover for single servers or entire sites for DR testing or recovery with Axcient Runbooks

Simpler to Manage, Simpler to Recover

Chain-Free Backups

- x360Recover uses a patented Chain-Free pointer-based array algorithm for image-based backup snapshots
- Each snapshot is independent, bootable, and fully recoverable
- > Never reseed, even after rollback
- Zero-configuration, zero-touch deployment and management
- Cloud-driven resiliency to silent data corruption
- → Consistent virtualization performance
- → Easy cloud virtualization/failback

D2C with Local Cache

- → Accelerate recovery from a local NAS or USB with Local Cache for Direct-to-Cloud (D2C) for faster RTO
- → Cloud-driven and deduped
- → "Heavy lifting" done in cloud
- → 50x less RAM/CPU locally (0.2 GB/TB)
- Local Cache is optional, but highly recommended for servers protected by D2C
- Zero consolidation = no interference with production system
- D2C provides fast RTO: Estimate Your recovery time with this D2C Recovery Time Objective Calculator info.axcient. com/rto-calculator

Instant Recovery 2.0

- Locally virtualize any recovery point within seconds (D2C w/ local cache acceleration)
- Seamless backups while virtualized (zero-config, zero-touch)
- Simple and lightweight toolchain:
 min download; installs in seconds
- → Flexible Recovery Options: Recovery Playbook
- Well suited for simple SMB environments with non-clustered hypervisors/standalone environments
