

x360 Recover

Business Continuity and Disaster Recovery

Data Sheet

Axcient

Protect Everything™

Endpoint Backup

Protect data for remote employees and satellite offices.

No-Hardware BDR

Basic server backup to disk and cloud. Full business continuity.

Full Service BDR

Backup to turn-key appliance and cloud, with application-aware, immutable backups for full business continuity.

Public or Private Cloud Backup

Protect servers in Azure, AWS, Google, or your private cloud with long-term retention.

One Solution From One Vendor for Better Margins and More Recurring Revenue

Axcient x360Recover is the most flexible and cost-effective business continuity and disaster recovery (BDR) solution for MSPs and the SMBs they serve. Easy to manage, x360Recover boasts Chain-Free backups, AutoVerify, AirGap and PSA/RMM integration. These technologies mean there is no chain management, data is checked for corruption after backup, backups are protected from ransomware and deletion, and ticketing and billing processes can be fully automated. All Axcient products are built by former MSPs, sold only to MSPs and built to optimize MSP workflows and processes.

Critical capabilities of x360Recover include:

- **Never reseed and no chains to break** because your backup is chain-free
- **AutoVerify ensures backups** are always recoverable via boot and deep volume checks
- **Flexible backup schedules** as often as every 15 minutes
- **Ransomware protection** because AirGap protects your backups against attackers
- **Near-instant virtualization** locally and in the cloud
- **Predictable billing** with flat fee pooled storage
- **Backup public cloud VMs** (Azure, AWS, GCS, etc.)
- **Appliance-free option** with **Direct-to-Cloud**
- **Local cache to accelerate restores** and virtualization, chain-free
- **Self-management of cloud disaster recovery** and virtualization with Virtual Office
- **Automate ticketing and billing** processes with PSA and RMM integration
- **BYOD Choice** – bring your own device or use your data center
- **x360Recover agent for Linux** for full image-based backups for appliances and Direct-to-Cloud

“ The relationship that we have with Axcient is something that we value tremendously. Axcient values the relationship we have with them and takes the time to address our concerns. It’s definitely a team effort and behind that team is just great people.

–Robert Cioffi, COO, Progressive

KEY FEATURES:

Protect Everything:

Support for Windows, VMware, Hyper-V, Linux, and IaaS

Direct-to-Cloud:

BDR **without the appliance** and associated costs and maintenance, with Local Cache for faster folder, file and bare-metal restores

AirGap:

Never pay the ransom – **AirGap** safety archive ensures protection in the case of malware.

BootVM with AutoVerify:

AutoVerify is an enhancement to x360Recover's nightly BootVM check feature which validates the recoverability of backup snapshots and captures a screenshot of the protected system.

Bring Your Own Device:

Purchase or lease BDR hardware appliances from Axcient or **BYOD**. x360Recover installs in <10-minutes on any Ubuntu certified hardware

Bring Your Own Cloud:

The **choice is yours**. Local backup and recovery with an onsite appliance, offsite replication to your Data Center or Cloud, and replicate to Axcient's Cloud

One-click Restore:

Full **Virtual Office** capabilities to instantly failover single servers or entire sites almost immediately and automate recovery with Axcient Runbooks

One Platform Delivering Comprehensive Coverage to Backup Everything

Chain-Free Backups

- x360Recover uses a pointer-based array algorithm for image-based backup snapshots
- Each snapshot is independent, bootable, and fully recoverable
- Never reseed, even after rollback
- Zero-configuration, zero-touch deployment and management
- Cloud-driven resiliency to silent data corruption
- Virtualization performance remains consistent over time
- Easy cloud virtualization/failback

Cloud -Driven Deduped Local Cache for D2C (Optional)

- “Heavy lifting” done in cloud
- 50x less RAM/CPU locally (0.2 GB/TB)
- Store to any type of local storage
- Zero consolidation = no interference with production system

Instant Recovery 2.0

- Locally virtualize any recovery point within seconds (w/ cache accel.)
- Seamless backups while virtualized (zero-config, zero-touch)
- Simple and lightweight toolchain: <1 min download; installs in seconds
- Well suited for simple SMB environments with non-clustered hypervisors/standalone environments
