

x360Recover Direct-to-Cloud for Microsoft Azure

Azure Egress Cost Estimator

Business Continuity and Disaster Recovery for Microsoft Azure

With Axcient **x360Recover Direct-to-Cloud (D2C) for Microsoft Azure**, MSPs can protect, virtualize, and recover their client's Azure data and ensure true business continuity. Built on the same best-in-class proprietary **Chain-Free backup technology** as our other products, x360Recover D2C for Microsoft Azure skips the local appliance and sends data straight to the cloud. MSPs can protect applications, endpoints, and data running within Azure with full virtualization and virtual machine (VM) export for immediate failback.

Transparent and Fair Egress Fees

Axcient does not bill partners for egress fees, those costs are billed by Microsoft. We price x360Recover Direct-to-Cloud for Microsoft Azure at a flat fee per month, the same way we do all of our x360 Products. Use this calculator to estimate your egress costs.

Enter GB

Amount of Used Data on All Protected Systems

☐**Yes**☐**No****Is Data Compressible?**

Choose no if the data is primarily images/video/etc

Continent of Azure Region**Estimated One-time Egress Azure Cost:**

One-time - required for full backup to get initial data transferred.

Estimated Monthly Egress Azure Cost (Low End):

Estimated range of ongoing egress costs for incremental backups.

Estimated Monthly Egress Azure Cost (High End):

Backing up more frequently will increase egress costs. We suggest hourly backups during business hours to start.
